DroneFly appoints new principal operations specialist

CALGARY, October 15, 2023 - The leader in Canadian drone development and aircraft innovation welcomes a new Principal Operations Specialist. Joseph Ferri will be taking over the position at Dronefly Technologies Inc.

“The team at DroneFly welcomes Mr. Ferri with excitement and open arms,” said Charlie Ray, CEO of DroneFly. “We expect great things from his knowledge and leadership experience.”

Using the skills he developed while studying Drone Operations at the Southern Alberta Institute of Technology, Ferri worked as a pipeline surveyor and drone operations consultant. Most recently, he worked as a senior consultant for the Canadian Armed Forces, completely transforming their now internationally regarded UAV program. Ferri held the position for four years before signing a contract position with Dronefly, which led to his appointment as principal operations specialist.

The responsibilities of the principal operations specialist include ensuring the assigned UAV packages align with the task outline. This includes technology analysis, pilot testing and assignment compatibility. Ferri will also be tackling the efficiency of Dronefly’s Drone Emergency Dispatch, aiming to improve the timeliness of completed tasks by 5 per cent by December 2024.

Founded in Calgary in 2010, DroneFly is a leading innovator in remotely piloted aircraft services. The company found success in marketing highly customizable UAV packages

SMALL BUT MIGHTY MICROWAVE BECOMES LUNCHTIME GAME CHANGER

TORONTO - October 4, 2023 - Small Tech Corp. is set to release a brand new, innovative product called the *MiniWave*, a portable microwave that can fit in all backpacks and even some purses. It is the first-ever battery-powered microwave and perhaps the first in a long line of portable appliances.

“We wanted to make fast and easy meals, even faster and easier,” says PR director of Small Tech Corp., Homer Soupson. “With commuting becoming more prevalent and the increased amount of travel and road trips in 2023, we wanted to create a solution that would benefit those occupied with their busy, active lifestyle.”

The release date of the *MiniWave* is to be announced by late December 2023. The price is still yet to be determined, however, founder and CEO of Small Tech Corporation Clive Hamderson states the product will be in the mid-range of affordability. “The *MiniWave* is made for the hardworking Canadian, it only makes sense to allow them to access to something of this convenience.”

Small Tech Corp. provides creative solutions to practical, everyday problems through innovative technological creations to consumers all over Canada. They are leaders in the Canadian home appliance industry and continue to grow at a rapid rate.
